ABOUT KRUGER TARGETS

Kruger targets signed a license agreement with the NATIONAL RIFLE ASSOCIATION OF AMERICA. (From left: Joachim Seibold, Kayne Robinson, Mike Krei, Andreas Krüger)

Kruger Targets are manufactured in our own printing facility, by our team of highly trained professionals using the latest state-of-the-art technology. Over the last 40 years, our high-quality and affordable targets have been the first choice for shooting sports competitors, clubs, and Associations. The cleanest shot-holes and the highest precision are your guarantees of consistently high quality standards, which meet all of the demands of the target shooting sports right down to the finest detail.

We use special printing inks to achieve a deep black, non-reflecting aiming mark, which is sharp-edged and accurate in all dimensions.

The special quality of the machine-smooth 210 gram board made from short-fiber raw materials, ensures that the shot-holes do not have fluffed, or irregular edges.

This characteristic contributes to quick scoring, whichever of the normally accepted scoring systems is in use. The newly manufactured targets are delivered to you wrapped in special packaging film, to ensure that the targets which are in use today are fresh and free from the effects of humidity.

High standards of continuous quality control ensure that the Kruger-Quality which has been well-known for decades, continues to rate as the trademark of a world-renowned and competent manufacturer and supplier.

Having been chosen as Official Supplier for the **INTERNATIONAL SHOOTING SPORT FEDERATION (ISSF) in 2006** the high quality of our targets was anew certified and approved by a World Sport Federation. Since 2006 we also are accepted as Official Licensed Manufacturer of Target Faces by the **WORLD ARCHERY FEDERATION (WA)** formerly FITA.

Thus, Kruger-Druck is the only producer of targets worldwide for rifle and pistol shooting, and of target faces for archery, which meet the high requirements of both Federations.

These high quality „Made in Germany“ targets are now also in demand from the worlds‘ largest shooting federation, the **NRA (National Rifle Association of America)**. Now more are than 4 million members will be able to shoot over 11,000 matches on Kruger targets.

After the **„National Rifle Association of America (NRA)“** we are choosen as well from the the **American Olympic Shooting Federation, „USA Shooting“,** to become their licenced target manufacturer. American sport shooters trust on quality targets **„Made in Germany“!** Kruger, the world-wide leading manufacturer of **ISSF** quality targets, continues to expand!

The Orion Advantage

- Orion is truly the world's first affordable electronic scoring system.
- Orion automates the scoring process using commodity scanners and your Windows based PC.
- Shots are typically scored within .10mm or better.
- Match results are automatically calculated and may be easily displayed on World Wide Web.
- Orion can provide valuable coaching feedback to shooters through its shot group analysis and tracking tools.
